New Plant Opens

J&J Truck Bodies & Trailers announced the completion of an additional 120,000 square foot facility in Somerset, PA. The new plant contains 100,000 square feet of manufacturing space and 20,000 square feet for administrative offices and training classrooms. The addition of this plant gives the company a total capacity of over

260,000 square feet to manufacture dump truck bodies, trailers, and specialty equipment.

The new facility will allow J&J Truck Bodies & Trailers to increase production to meet expected market demand. Jerry Johnson, Vice President of Somerset Welding & Steel, commented, "We know the current downward trend

in our industry is only temporary, and this plant positions us as a company that is ready to supply customers with the truck equipment they will need to move their businesses into profitability. The additional plant will let us better serve these customers with faster turnaround time, expand our market share, and build quality truck equipment with state-of-

New Plant

the-art manufacturing processes.” S. William Riggs, President of Somerset Welding & Steel added, “It will also allow us to enter more international markets where potential business is very promising.”

The new plant, which opened in December of 2000, is fully operational. It was designed and equipped with the most innovative technologies available on the market today. Computerized statistical control processes, new manufacturing equipment, and ISO 9001 quality procedures will guarantee customers quality built truck equipment and timely delivery schedules.

J&J's new plant is in full production. Here, a chassis waits for its dump body, while another is almost completed.

Available For Immediate Delivery

Priced to sell. Call Ron Wright for full specs and pricing. 800-777-2671 or 814-443-2671.

This dump truck is a favorite of townships and municipalities and is used in a wide variety of road maintenance applications.

- 2000 Volvo WG42F plus cab
- J&J factory demonstrator in mint condition
- J&J DynaControl load sense central hydraulic system with automatic spreader control plumbed for plow and spreader
- Heavy-duty custom plow hitch with double acting lift cylinder and telescoping lift arm
- 300 hp, 950 LB-FT torque with engine brake
- Fuller 10 speed Auto-select transmission

This popular model was the first truck to be completed at the new plant and was recently delivered to a customer in Maryland. It is also a similar model to the truck that was recently featured on the cover of the Fall issue of *Bulldog* magazine.
