The Latest News from J&J Truck Bodies & Trailers<sup>AE</sup>  
A Division of Somerset Welding & Steel, Inc.

## Frameless Dump Trailer Offers Lighter Weight Solution

**L**ow sides and the absence of a frame on this trailer allows operators to haul maximum payload in a lighter weight, yet extremely durable dump trailer. It is constructed with top grade materials and comes with many standard features and a wide variety of popular options.

J&J personnel recently showed this frameless dump trailer at the Western Maryland Truck Show in Grantsville, MD. Pictured from left to right: Jerry Johnson, Vice President; Bob Hall, Mid Atlantic Regional Manager; and Mark McClintock, Mid Atlantic Regional Trailer Sales.

## Commemorative Stone Placed at Shanksville Crash Site by J&J Staff

**T**odd Eutin (pictured left), John Stiteler, Brad Cole, and Aaron Rugg, employees of J&J Truck Bodies & Trailers, recently delivered and placed a 500 lb. rock at the Shanksville crash site. Mr. William Rankin, of NYC, purchased the rock from the Riggs Reactors at an auction held at the Somerset Relay for Life Race. He donated the stone to Somerset County and asked that it be placed at the crash site in memory of the victims of September 11th.

Employees of Riggs Industries, and all its divisions, including J&J Truck Bodies & Trailers, participated in the Relay for Life in Somerset, PA. The team, Riggs Reactors, auctioned the stone, given to them by the stone designer, Randy Airesman of Berlin, PA. The proceeds were donated to the American Cancer Society.

Approximately 3,000 people attended memorial services that were held in Shanksville last September. The crash site, located approximately 12 miles from the J&J plant, continues to draw visitors from all over the country.

Built for the long haul.<sup>®</sup>

## U.S. Municipal Supply Hosts Annual Open House at J&J

Approximately 400 people attended U.S. Municipal Supply's open house last summer. The event was held at J&J Truck Bodies & Trailers' manufacturing facility in Somerset, PA. Guests viewed the latest equipment from several suppliers, attended seminars and plant tours, participated in door prize drawings, and were treated to lunch.

U.S. Municipal Supply is an authorized J&J distributor. Visit them at [www.usmuni.com](http://www.usmuni.com)

## Half Round Bodies Headed to Maryland

The first of several half round dump bodies ordered by a construction company in Maryland, recently left the J&J facility. The half round design allows operators to easily discharge asphalt and other paving materials. All dump bodies will be mounted on Peterbilts.

Becoming an increasingly favorite model with paving and road construction companies, this is a versatile dump body that can be used for most any material hauling application.

Many customers are choosing the optional polished aluminum finish.

### Aluminum tread plate sideboards provide a great look

This medium-duty dump body is mounted on a new Kenworth T-300 chassis. The steel dump body features aluminum tread plate sideboards, giving it a great look and allowing the owner to haul more payload. Truck Enterprises, Keyser, WV, showed this truck and others at the Western Maryland Truck Show in Grantsville, MD.

A **DynaHauler/SE**, polished aluminum, semi-elliptical dump body, was recently delivered to R.W. Smith, a trucking company in Danboro, PA. Dick Smith, the owner, chose this model for its lighter weight features, allowing him to haul more asphalt and other materials for his customers. The dump body is installed on a Peterbilt chassis supplied by Hunter Keystone, a dealer located in Breinigsville, PA.
