New Truck Body Used to Haul Debris from Disaster Sites

Paul Bunyan, Inc., a Pennsylvania-based company, recently ordered two of these bodies from J&J Truck Bodies & Trailers. They will be used to haul debris from natural disaster sites that are most often caused by tornadoes, hurricanes, and flooding. The company's trained debris removal crews can be sent at a moments notice to anywhere in the United States where cleanup and excavation is needed. Most recently, Paul Bunyan crews were in Texas clearing debris caused by the flooding in that state. In addition to experienced crews, the company maintains a fleet of heavy-duty trucks, trailers, and other material handling equipment. The two new aluminum bodies were mounted on Volvos and each body is 24 feet in length with 102-inch sides. They were mounted in front of Prentice log loaders and each truck is built to haul a trailer with a similar body; the combined total capacity is 105 cubic yards for each double unit.

Demo Unit Travels Across USA and Canada

This J&J stainless steel dump body was shown to salt and sand distributors across the U.S. and Canada. All hydraulic components including the electronic controls were supplied by Parker Hannifin, a leading manufacturer of motion and control technologies and systems. The crossmemberless body is mounted on an International 7400 chassis and is an ideal total package for anyone who is responsible for winter time road maintenance. J&J is a Parker Hannifin IQAN distributor.

This demo unit will be available for sale in October 2003. Contact Ron Wright by email at rew@jjbodies.com for more details.

Built for the long haul.™

Somerset Welding & Steel Celebrates ISO 9001:2000 Certification

Somerset Welding & Steel recently treated employees to ice cream sundaes and cake during their ISO 9001:2000 celebration party. Employees were recognized for their hard work and dedication in making this possible for the company. Somerset Welding & Steel currently operates J&J Truck Bodies & Trailers, J&J Truck Equipment, and Lincoln Supply & Equipment. An integral part of the quality program at Somerset Welding & Steel embraces 4 key elements:

- ★ **S**atisfying customer needs
- ★ **P**roducing a high quality product
- ★ **D**elivering on time
- ★ **I**mproving continuously

Riggs' family members take time out for a photo during the ISO party. From left to right: Michael Riggs, Quality Assurance Manager, Sidney Riggs, Chairman and CEO of Riggs Industries, and Bill Riggs, President of Somerset Welding & Steel

McDevitt Trucks Named Dealer of the Year

J&J Truck Bodies & Trailers would like to congratulate McDevitt Trucks, Inc. on being named the ATD (American Truck Dealers) 2003 Heavy Duty Truck Dealer of the Year. It is a well deserved recognition and we wish you the best as your business continues to grow and flourish. J&J and McDevitt Trucks have enjoyed a successful professional relationship over the past several years and we look forward to contributing to your future growth. We also recognize the McDevitt Truck staff as an excellent team to work with -- they are knowledgeable, experienced, and professional. Again, congratulations on this honor.

Great Value...

Frameless J&J Trailer Takes First Prize

Excavating Associates, a Maryland-based company recently took this new dump trailer to the Western Maryland Truck Show. The trailer is pulled by the firm's Kenworth tractor, and the winning combination was rewarded with a First Place as Best of Show.

DYNA HAULER /

Recently delivered custom built dump bodies and trailers.

The lighter weight steel crossmemberless (LWC) and material hauler (MH) models are versatile dumps that can be used in most any hauling application.

Demolition and quad axle dump trailers are ideal solutions for heavy hauling applications.

PRSRT STD
 U.S. POSTAGE
 PAID
 GREENSBURG, PA
 PERMIT NO. 88

No crossmembers on the LWC model makes this steel dump a lighter weight solution.
