Peterbilt® Makes it Easy to Spec an Aluminum J&J Body

Legendary styling and exceptional durability and quality from Peterbilt and J&J Truck Bodies & Trailers come together with the Integrated Dump Truck Body Program, now available directly from Peterbilt truck dealerships. Customers will get a premier aluminum dump truck body that is built to their specifications and customized to suit their individual hauling applications. J&J's ability to customize and engineering experience assures Peterbilt customers that they will be teaming up their Peterbilt truck with a dump body that's built just for them.

(continued on page 2)

The DynaHauler/MH (pictured above) is only one of several aluminum dump body models available under the new Peterbilt/J&J Program. Other models include a heavy-duty construction hauler that features side braces for additional strength, a medium-duty model and a half round dump body design. All bodies can be customized and are available in several different sizes and lengths.

NEW FROM J&J...Smooth Side Dump Trailers

Smooth side trailers are fuel efficient, aerodynamic and ideally suited for aggregate hauling applications - sand, gravel and similar materials.

Thibeault Corporation of New England recently ordered six of these new smooth side dump trailers. Thibeault was founded in 1983 and is one of the largest excavating companies in New Hampshire today.

In addition to doing large site and demolition jobs, the company operates several sand and gravel pits and quarries and is a major supplier of aggregate materials. Thibeault Corporation is also involved in equipment sales and rentals and commercial and residential real estate development.

The 28-foot aluminum trailers are mounted on steel frames and feature AERO 550 electric tarpers and Hendrickson lift axles.

Built for the long haul.™

Tipper Trailer Features 8 Axles

This tipper was ordered by a company in Ohio who will use it to haul waste to landfills. The trailer is 50 feet in length and is outfitted with 3 spring and 5 lift axles to meet bridge weight laws in Ohio. At J&J, we can easily customize your trailers and dump truck bodies to meet various state laws. Watch for our Kentucky spec dump trailer in our next newsletter!

Chad Bunk

J&J is First to Certify Technicians on International's® Advanced Diamond Logic™ Software

Chad Bunk and Jason Maline recently attended a training program in Chicago where they earned their Advanced certification on International Truck & Engine's Diamond Builder Logic software. J&J Truck Bodies & Trailers is the only dump truck manufacturer to have Advanced Level certified technicians on our staff, which puts us in the unique position of offering our International chassis customers a higher level of service.

Jason Maline

This exciting new technology from International allows dump truck body builders to easily integrate the chassis and body electrical systems and accommodates an infinite variety of vehicle configuration options, enabling J&J to create customized electronic features for our customers. Diagnostic capabilities are also built into Diamond Builder Logic software for diagnosing chassis and integrated body equipment controls, reducing troubleshooting and repair times.

Peterbilt Dump Body Program *(continued from page 1)*

Not only does this program give customers the convenience of working with just one supplier, it also provides for faster turn-around time and just one simple invoice. It's never been easier to get a top of the line dump truck that's ready to take on the toughest hauling jobs day after day, year after year. See your Peterbilt dealer today for more details or call J&J Truck Bodies & Trailers at 800.777.2671 and ask for Lisa or Randy.

Need more information on our dump bodies and trailers?

With a J&J trailer, hauling trash never looked so good!

Top Waste Hauling Firm Orders J&J Live Floor® Trailers

A leading waste hauling company ordered several of these steel live floor trailers. The reinforced side braces provide extra strength and durability and the high sides maximize payload capacity. The trailers are 48 and a half feet long, 102 inches wide, 160 inches high and have a cubic yard capacity of 120. In addition to trailers outfitted with KEITH® WALKING FLOORS® or HALLCO LIVE FLOORS®, J&J also manufactures other transfer trailers such as tippers and aluminum and steel push outs.

Built to haul coal.

Midway Truck Center, Bethel, PA recently delivered these Western Star trucks to Blaschak Coal, Mahanoy City, PA. The aluminum bodies are reinforced with side braces, making them ideally suited for the harsh conditions that are often times found at coal mining sites. Since 1937, Blaschak Coal has been in the forefront of the anthracite industry by using the latest technology, equipment and mining innovations.

Jim Gooden Joins J&J Sales Staff

Jim Gooden was recently appointed Regional Manager for Mid-Atlantic Trailer Sales. In this capacity, Jim will be working closely with J&J distributors to increase trailers sales and to provide customer support and service. Prior to accepting this position, Jim worked for over 24 years in J&J's trailer plant operations. According to Jerry Johnson, VP of Sales & Marketing at J&J, "With so many years of trailer experience, Jim Gooden was the logical choice for this sales position. He has demonstrated a commitment to our

company and to our customers. His extensive experience, technical skills and knowledge will be a great asset." Jim can be contacted on his cell phone at 814.442.0663.

Holiday Garden Center, Plum Boro, PA ordered this light-duty dump body for their new Ford F550 truck. The body features two pine boards on each side, giving this truck maximum payload capability. Holiday Garden Center will use it to haul landscaping materials.

Visit the Driver's Lounge section at Kenworth's web site for free maintenance tips like these.

Sail Through Those Heat Waves!

Summer's on the way, and with it come the challenges that heat brings to your truck. Idling your way through highway construction projects, climbing steep mountain passes, and getting through gritty cities can all take a toll on your truck -- and you! This is the time to get your truck ready for summer so it can take the heat and you can work in comfort.

Heating and Air Conditioning System:

- Check to see if the air conditioner stops cooling at idle or when waiting at a stoplight. When you're idling, listen also for the A/C fan. If it's cycling on and off excessively, that's a sign of a possible problem.
- Visually check the hoses, clamps and the drive belt for cracks or holes.
- Clean the system filter regularly.
- Clean the air conditioning condenser.

Electrical System:

- Secure your alternator's mounting and visually check the alternator's wiring.
- Ensure that the battery is firmly mounted in the battery box.
- Check the integrity of the battery cables where they connect to the battery, and make sure that the fasteners are secure.
- Check the wiring to and from the engine's electronic control unit to make sure that it is in good condition.

J&J Truck Bodies & Trailers does not endorse one chassis manufacturer over another. However, we do think every truck looks better with a J&J body on it. Order yours today!

This polished aluminum J&J dump body is mounted on a Kenworth W900L and was sold to an excavation company in Maryland.

Lubrication System:

- Check the levels in the oil reservoirs.
- Check all the other reservoirs as well, including the power steering, steer axle wheel bearings, the engine, the transmission and the differentials. Steer axle wheel bearing lubrication is critical in the summer, when air from the road can reach 140° F or higher, heating up the oil and changing its viscosity.
