

# The Long Hauler™

Volume VI Issue 4  
October - December 2005

The Latest News from J&J Truck Bodies & Trailers®  
A Division of Somerset Welding & Steel, Inc.

The ultra light HARDOX® steel dump body provides a considerable weight savings over traditional side post models. This particular body is mounted on a 2006 International® 7600 chassis provided by Five Star International, Harrisburg, PA.

## New Ultra Light Crossmemberless Bodies from J&J

The new ultra light and ultra durable steel crossmemberless dump bodies feature a telescopic M-Series (MAILHOT Industries) hydraulic cylinder, a bulkhead and doghouse formed with one-piece HARDOX® steel and newly designed single sheet sides and tailgate construction. These features, including the lack of traditional side posts, make these dump bodies an excellent lighter weight solution for your material hauling needs. More payload means more profit!

## Tipper trailers and more available at J&J

Tipper trailers are one of our most popular transfer trailers. Used widely in the waste hauling industry, J&J tipper trailers easily disengage from their tractors and discharge their payloads within a matter of minutes. With up to 133 cubic yard capacity, owner/operators can haul maximum payload with each trip they make. At J&J, we also manufacture moving floor trailers, which are an ideal waste hauling solution when tipping platforms are not available at the landfill. In addition, J&J is one of the few trailer manufacturers that builds push out/ejector trailers that are commonly used by government agencies and commercial haulers for hauling sludge and municipal waste.

Call J&J Truck Bodies & Trailers for all your transfer trailer needs. We can help you spec the model that will suit you best. We also have in-stock units that are ready for delivery now.

## Long to Head Asian Sales

J&J Truck Bodies & Trailers has appointed Mike Long as Director of Asian Sales. In this capacity, Mike will be responsible for overseeing J&J's interests in the Asian market and will promote and sell dump truck bodies, trailers and specialized truck equipment to mining, construction and oil companies. In addition, he will concentrate on municipal agencies throughout the Asia-Pacific rim, with special emphasis in the Chinese market.

Most recently, Mike served as a sales representative for J&J Truck Equipment. He brings with him over 26 years in the truck equipment manufacturing industry including 13 years working with customers within the Asian market. "The rapid development of construction and coal related industries in this part of the world offers J&J Truck Bodies & Trailers an opportunity to increase market share and broaden our existing customer base in the international arena. Mike Long's past experience in traveling to the region makes him an ideal candidate for this position," said S. William Riggs, president of Somerset Welding & Steel.

Beginning this fall, Mike will move to Hohhot, a conveniently centralized location in China that will allow him to travel to various parts of that country and other Asian countries as well. He will work with American truck manufacturers to provide J&J customers with the truck bodies and equipment necessary to meet their rapidly increasing demands. Mike will live in Hohhot on two-month intervals, spending equal time in the U.S. and China.

## DYNAHAULER/LDC

Whether you choose steel, aluminum or stainless steel, this dump body is the right choice for your light-duty chassis. The unit shown is available for immediate delivery.

LDC dump bodies are a favorite with landscapers, contractors and government agencies. They can be easily outfitted with snowplows and optional fast latch tailgate hardware.

## Dump Trailers Go to Russia

Four of these J&J custom built enclosed dump trailers were purchased through a distributor in Texas. They will be sent to Russia and used to primarily haul sand. The trailers are outfitted with top filling hatches and hydraulic rear chutes that will be used to distribute the sand into targeted areas.

## Count on J&J for QUALITY

At J&J, we closely inspect every truck body and trailer we build. According to our satisfaction surveys, the number one reason our customers choose us is because of the quality of our truck equipment and our attention to detail.

## Excavating Company Orders J&J Frameless Dump Trailer

**A**n excavating company recently took possession of a new J&J polished aluminum frameless dump trailer. The trailer was transported by the company's new W900 Kenworth®, a tractor that's ideally suited for heavy hauling applications. J&J frameless dump trailers are lighter weight, yet rugged enough to haul heavy bulk commodities. This particular dump trailer, with a 57 cubic yard capacity, is 40 feet in length, has an inside width of 88 inches and is 64 inches high. The ground controlled tailgate (available on the optional 3-way tailgate) eliminates the hassle of climbing to the top of the trailer to disengage pins that are often times difficult to operate.

## Order NOW for the Spring 2006 Construction Season

J&J aluminum and steel dump bodies set the standard for quality and durability. Many models and sizes to choose from and we can customize to suit your hauling application.

Don't be disappointed! Order your dump truck bodies early, so you'll be ready with the equipment you'll need to get those construction projects done. At J&J, we can also build you replacement bodies. It's a cost-effective solution in extending the life of your current construction equipment.
