Riccelli Enterprises Adds 10 New Trucks to its Fleet

Riccelli Enterprises ordered 10 of these J&J heavy construction aluminum dump bodies for their new Freightliner trucks. The bodies feature a 1/4-inch HARDOX® steel floor and are 18 feet, 11 inches long. The addition of side braces allows haulers like Riccelli to use these bodies for their heavy-duty hauling applications.

Riccelli Enterprises is one of the largest haulers of bulk commodities and waste transfer in the Northeast. On a daily basis, the company operates more than 650 (300 Riccelli-owned) power units that are radio dispatched and GPS tracked. Despite the company's large expansion, Riccelli Enterprises remains a family business that treats its customers and employees as if they were a member of the family. The founder and president of the business, Joseph Riccelli, takes pride in being a part of almost all major decisions at the company while his son, Richard, is being groomed for the position. Matt Simmons is the current vice president of operations.

This 50-foot J&J moving floor trailer was recently delivered to a leading waste management firm. The trailer features 7 axles, extra high sides and is equipped with a Keith® Walking Floor.® The trailer will be used in Michigan to haul waste to landfills.

New 7-Axle J&J Trailer Goes to Leading Waste Hauling Company

In Michigan, this 7-axle trailer can legally haul up to 57 tons of payload!

Built for the long haul.™

Ask our expert team to spec your next dump body or trailer! You can rely on their 200+ years of combined experience to put together a specification package that will meet your hauling needs.

J&J Expands Booth Size at Mid America Truck Show

J&J Truck Bodies & Trailers has expanded their booth size and moved their booth location to the newer South Hall wing at the next Mid America Truck Show which will take place March 23-25, 2006 at the Kentucky Fair and Expo Center in Louisville, KY. J&J's booth number is 5820 and we hope to see you at our new location at the show. We'll have our newest combination of trailers and dump truck bodies on display.

DYNAHAULER/SE

This J&J semi elliptical dump truck body was ordered by Kenworth of Pennsylvania, New Stanton, PA for a customer who will use it for construction hauling applications. The 17½ foot steel dump body is mounted on a Kenworth T800, a popular vocational chassis model. Semi elliptical bodies are ideal for medium to severe-duty applications as well as hauling asphalt, gravel, sand and other aggregates.

DynaHauler is a registered trademark of Somerset Welding & Steel, Inc.

EVO...The evolutionary smooth side option from J&J Truck Bodies & Trailers!

Orders Increase for J&J's LWC Ultra Light Bodies

The new LWC Ultra Light model has been well received by J&J customers and we expect the number of orders to increase dramatically in 2006.

Forming the structural integrity into the HARDOX® side sheets and eliminating the side posts on our traditional light-weight crossmemberless bodies decreases their weight allowing owner/operators to haul more payload.

Light and medium-duty dump bodies are a favorite with small contractors, landscapers and government agencies.

Truck provided by Tri-Star Motors, Blairsville, PA.

The light-duty J&J aluminum body is mounted on a Ford® LCF chassis.

The medium-duty J&J aluminum body is mounted on an International® 7500 chassis.

Don't be disappointed. Order your dump trucks and trailers TODAY for your spring construction and waste hauling needs.

Count on us for **QUALITY** products that work hard and are built to last.

J&J Dump Bodies Set the Standard in Quality and Durability

From left to right: Standard material hauler, two semi elliptical bodies and an ultra light crossmemberless dump body.

Steel can often times be the only choice when it comes to certain heavy-duty hauling applications. At J&J, we help our customers spec the right dump body for their specific hauling application. The use of light weight HARDOX® steel in many of our bodies reduces the overall weight allowing owner/operators to haul more payload with each trip they make.

There's no substitute for a dump truck body or trailer manufactured by J&J Truck Bodies & Trailers.
